Fall is an excellent time for planting most rock plants and alpenes. Fall planting usually means a sturdier plant and more flowers the first season. We particularly urge the gardeners in the warmer states to plant in fall as our plants are usually frozen solid at the height of your spring season. Some of the rarer sorts are usually sold out early in spring. Order yours now for fall delivery and be sure to have them. Make your selections from our 1954 Price List and send them along with your dwarf bulb order. Our fall season extends from September 15th to November 15th.

Don't forget to order your copy of our new Handbook of Alpines and Rock Garden Plants. It gives complete descriptions and cultural directions of over 700 plant varieties. Paper cover edition, 50¢; Hard cover edition, \$1.00.
